Hello dear breached users

I'm selling data of +400 million unique twitter users that was scraped via a vulnerability, this data is completely private

And it includes emails and phone numbers of celebrities, politicians, companies, normal users, and a lot of OG and special usernames.

You can read full use case of data here: <https://paste.ee/p/h4RGG>

Twitter or Elon Musk if you are reading this you are already risking a GDPR fine over 5.4m breach imaging the fine of 400m users breach **source**

Your best option to avoid paying \$276 million USD in GDPR breach fines like facebook did (due to 533m users being scraped) is to buy this data exclusively,

Which can go through the official owner middle man on here @**[Owner] pompompurin** or admin @**[Admin] Baphomet** after that I will delete this thread and will not sell this data again.

And data will not be sold to anyone else which will prevent a lot of celebrities and politicians from Phishing, Crypto scams, Sim swapping, Doxxing and other things that will make your users

Lose trust in you as a company and thus stunt the current growth and hype that you are having also just imagine famous content creators and influencers getting hacked on twitter that will for sure Make them ghost the platform and ruin your dream of twitter video sharing platform for content creators, also since you Made the mistake of changing twitter policy that got an immense backlash

From content creators this is a sensitive time, which will make things far worse and if you are unsure just run a poll on twitter like usual and people will choose their fate, because at the end of the Day it's the company's fault that this data was breached.

Here is some celebrities samples:

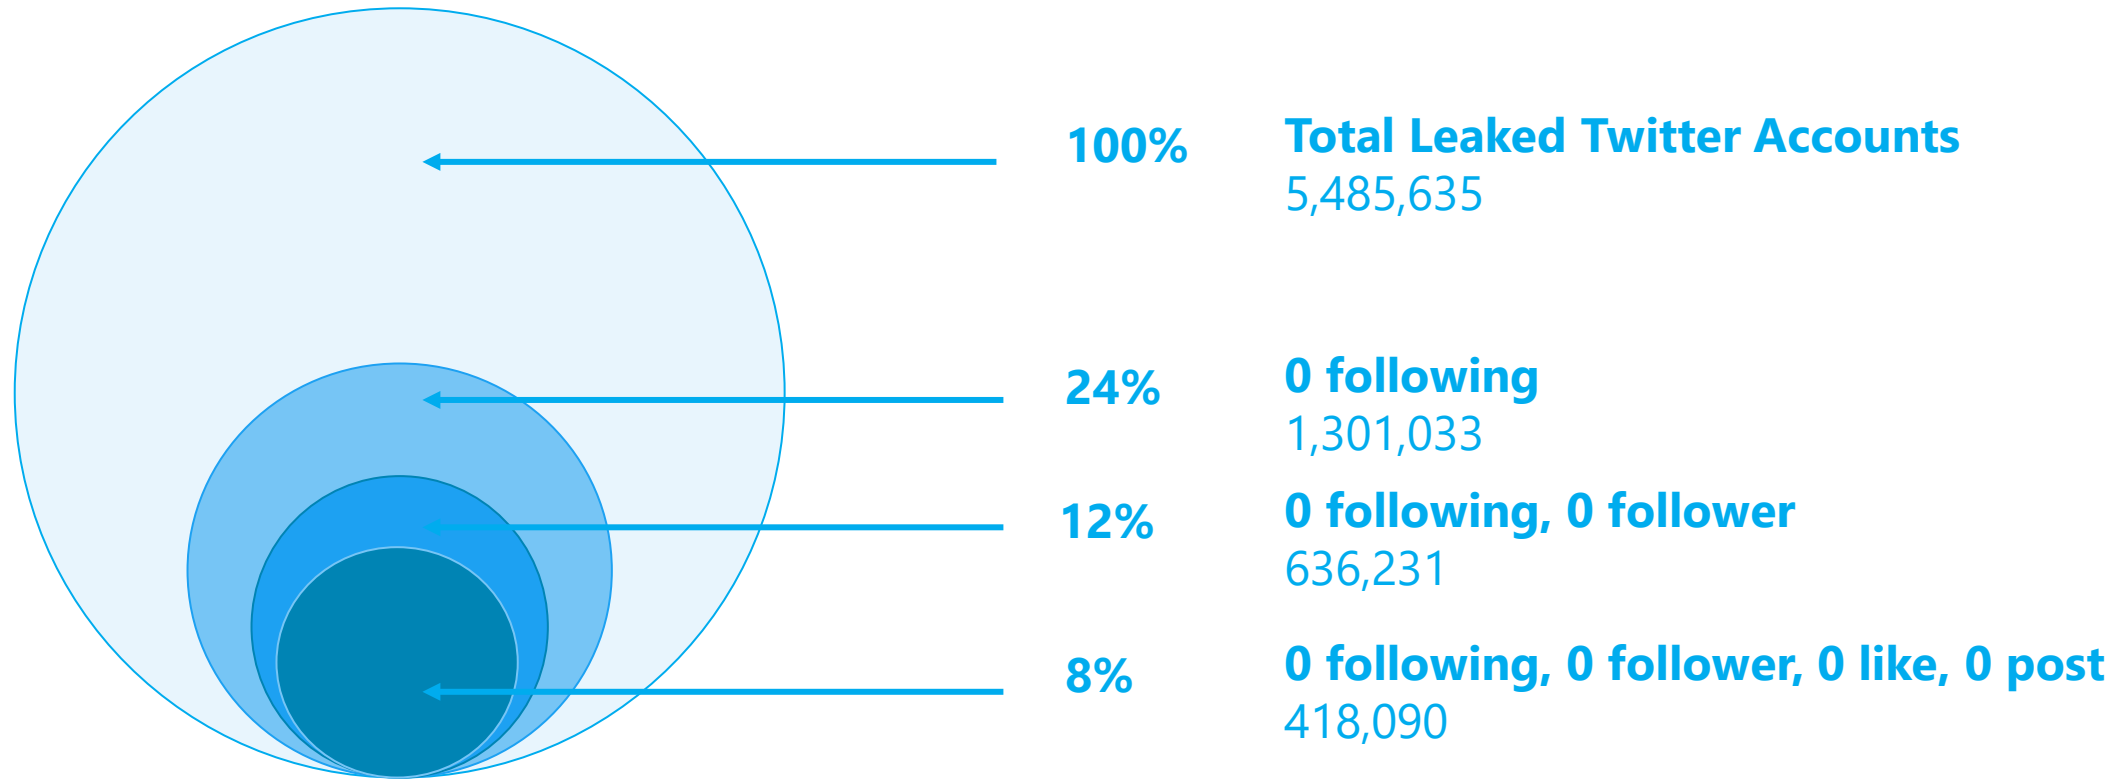

```
email,name,username,follower_count,creation_date,phone_number
```

```
_____,Alexandria Ocasio-Cortez,AOC,12772117,Wed Apr 28 22:38:40 +0000 2010
```

```
_____,SpaceX,SpaceX,18464597,Thu Apr 23 21:53:30 +0000 2009
```
